

Supply list for Navajo Embroidery Quilt Classes:

Purchase of the Navajo Quilt Full collection by Anita Goodesign prior to first planning session. (Cathey's) the collection can be purchased on line through [anita goodesign.com](http://anita.goodesign.com) using Cathey's AZ as your dealer. You can download the design collection to your computer. If you desire quilting on the sashing and border blocks also purchase Anita Goodesign Mix & Match Quilting Foundations Special Edition (this is not required to complete the quilt but will enable you to quilt the sashing and borders using the Mix & Match method.) Remember all the Mix & Match designs are interchangeable.

Must attend the first planning session to plan your quilt. We will discuss fabric choices and how much fabric to buy, stabilizers, threads, design choices, and answer questions about making your quilt.

Embroidery machine in good working order. The smallest hoop that can be used is a 5X7, but the quilt stitches much nicer with a larger hoop. I used my 8X8 hoop see the classroom example. The blocks come in 7.8, 6.5, 5.8, and 4.8 sizes.

Be familiar with your machine. Check it out before class if it needs servicing bring it to the store at least two weeks prior to classes starting.

Basic Embroidery and Quilting Supplies

Designs loaded on a USB drive, or on your machine

Stabilizers:

No Show Mesh by Floriani (Cathey's) Recommendation I use a lot of No-Show Mesh, and found it cost saving to buy the large roll 20 in X 100 yds. White.

Muslin amount will depend on size quilt you choose.

Batting: (Using batting in your blocks is a choice, I used batting)

Floriani Embroidery Batting amount depends on quilt size. (Cathey's)

Warm N Natural

Fabric:

Amount depends on quilt size. Color and amount discussed at planning session.

Fabric for block, sashing, and borders.

Also, for backing fabric.

Again, amounts will depend on size of quilt you pick.

Use prewashed, and ironed cotton.

Other notions: Walking foot, Pink embroidery tape, temporary spray adhesive (Cathey's)

Needles: Embroidery needles 90/14 (Cathey's) Many of the designs have over 50,000 stitches so extra needles are needed.

Thread:

I used Floriani embroidery thread 40 wt. (Cathey's). Excellent color selection. Word of caution (another quilter used an off-brand embroidery thread that bled into her quilt, I have never had this happen with Floriani. Too much time and effort for a disaster.)

Sewing thread to stitch blocks together, I matched the color I used in the squaring stitch.

Bobbin thread. I used prewound bobbins the size required by my machine, there are different sizes depending on your machine (Cathey's) I used beige. Prewounds make the stitching out much faster.

Bobbin thread to match top thread when stitch in the ditch, and stitching blocks together.

This is a fun project, not difficult but takes time, doing it over four months will make it even easier. *You will have homework.* The class format will be to show you how to do the techniques, with you stitching out at least one in class, then you will need to complete the assignment before the next class. In the end you will have a beautiful Southwest Quilt. Fire up your great machines and join the fun.
